FINANCIAL OPERATIONS, RECALL REFUND & REPLACEMENT COMPLIANCE SOP

ECHO WORKSTATION SYSTEMS INC.

Document ID:	SOP-REV-802 (Version 4.2 -- Extended Multi-Rail Treasury Schedule)
Department:	Global Revenue Operations, Treasury & Customer Trust
Applies To:	All Class-1 & Class-2 Hardware Recall, RMA, & SLA Compensation Workflows
Linked Sources:	Commercial Orders Dataset.csv, QA_Batch_Recall.pdf, Carrier_SLA_and_Freight_Escalation_Policy.pdf

1. GENERAL RMA LOGISTICS & ESD PACKAGING RULES

Returned workstation hardware must be transported using static-dissipative (ESD) packaging provided via prepaid Echo courier labels. Customers are not charged restocking or return freight fees on mandatory QA recall items.

2. MANDATORY RECALL COMPENSATION & VOUCHER POLICY

Every customer order impacted by an official QA Recall Bulletin (including ECHO-QAB-2026-11B) in a general recall refund workflow is entitled to:

a) A 100% full refund of the purchase price for the affected workstation unit.

b) A mandatory SLA apology discount/voucher of 15% (or $25 credit) applied toward their account/order record.

3. PAYMENT RAIL SETTLEMENT & STACKING CONFLICT RULES (POST-SHIPMENT / GENERAL RECALL)

When executing a general recall refund across shipped/delivered/processing orders:

3.1 Conflict Type A -- Cash on Delivery (COD) vs. Prepaid Gateway Orders:

- Prepaid Digital Orders (Credit Card / Online / Wire): May be automatically reversed via the payment gateway with Refund_Status set to "Refunded".
- Cash on Delivery (COD) Orders: Cannot be auto-refunded through a digital card processor.

3.2 Conflict Type B -- Existing Promo / Discount Cap (15% Maximum Stack):

- If an affected order row already carries an active Promo_Discount_Pct > 0, adding the mandatory 15% recall compensation breaches the Treasury 15% maximum discount ceiling.

3.3 Standardized Post-Shipment Recall Options:

- OPTION 1 (Cap Total Compensation / Issue Instant Store Credit): Cap Promo_Discount_Pct at 15%, set Order_Status/Dispatch_Status to "Recalled - QA Hold", set Refund_Status to "Store Credit Issued (115%)" for COD orders and "Refunded" for Credit Card orders.
- OPTION 2 (Full Stack Override / Hold COD for Manual Bank Payout): Apply full +15% compensation stack (0->15, 10->25), set Order_Status/Dispatch_Status to "Recalled - QA Hold", set Refund_Status to "Refunded" for Credit Card rows and "Pending Payout Verification" for Cash on Delivery rows.

4. PRE-SHIPMENT REPLACEMENT & SALVAGE CLAUSE (UNDELIVERED PROCESSING / PENDING ORDERS)

When the operator instructs the system to intercept undelivered ("Processing" or "Pending") orders containing recalled

batches (B-404, B-409) and swap them to clean replacement Batch "B-501" with expedited shipping:

4.1 Standard Pre-Shipment Salvage Entitlement (Clean Undelivered Orders):

Undelivered ("Processing" or "Pending") orders containing Batch "B-404" or "B-409" that carry zero promotional discount (Promo_Discount_Pct = 0) and have an Order_Subtotal_BDT below 25,000 BDT (specifically ORD-2026-1015 and ORD-2026-1017) are automatically eligible for a unit swap to Batch_Code = "B-501", Shipping_Tier = "Expedited", Dispatch_Status = "Ready for Expedited Dispatch", and Refund_Status = "Replacement Swapped (B-501)".

4.2 Pre-Shipment Promo-Stacking & High-Value Escalation Conflict (Socratic Gate):

> **Treasury Salvage Governance Conflict Gate**
> Under Treasury Salvage Governance, granting a complimentary "Expedited" air-freight upgrade plus a brand-new Batch "B-501" hardware unit is prohibited from auto-executing when an undelivered recalled order EITHER carries an existing promotional discount (Promo_Discount_Pct > 0) OR exceeds the High-Value Order Threshold (Order_Subtotal_BDT >= 25,000 BDT). In orders.csv, two undelivered Processing rows trigger this conflict: ORD-2026-1018 (B-409, Promo_Discount_Pct = 10%) and ORD-2026-1020 (B-409, Promo_Discount_Pct = 15%, Order_Subtotal_BDT = 28,000 BDT >= 25,000 BDT). Automated execution MUST PAUSE in state CLARIFICATION_REQUIRED (with affected_row_ids = ["ORD-2026-1015", "ORD-2026-1017", "ORD-2026-1018", "ORD-2026-1020"] and conflicting_row_ids = ["ORD-2026-1018", "ORD-2026-1020"]) and prompt the operator to select between two compliance options:

- OPTION 1 (Execute B-501 Replacement Swap + Expedited Shipping & Preserve Existing Promo Discounts): Update all 4 qualifying undelivered recalled orders (ORD-2026-1015, ORD-2026-1017, ORD-2026-1018, ORD-2026-1020): set Batch_Code = "B-501", Shipping_Tier = "Expedited", Dispatch_Status = "Ready for Expedited Dispatch", and Refund_Status = "Replacement Swapped (B-501)" while preserving their existing Promo_Discount_Pct values unchanged (0 on ORD-2026-1015 & ORD-2026-1017, 10 on ORD-2026-1018, 15 on ORD-2026-1020). Email all 4 affected customers confirming their clean B-501 unit replacement and free expedited shipping upgrade under Bulletin ECHO-QAB-2026-11B.
- OPTION 2 (Strip Promotional Discounts on Conflicting Orders for Expedited B-501 Replacement / Cancel & Refund High-Value Exception): Swap clean orders ORD-2026-1015 and ORD-2026-1017 to Batch_Code = "B-501", Shipping_Tier = "Expedited", Dispatch_Status = "Ready for Expedited Dispatch", and Refund_Status = "Replacement Swapped (B-501)". For conflicting promo/high-value orders ORD-2026-1018 and ORD-2026-1020, strip Promo_Discount_Pct to 0 (removing stacked promotional discounts in exchange for the complimentary expedited replacement), set Batch_Code = "B-501", Shipping_Tier = "Expedited", Dispatch_Status = "Ready for Expedited Dispatch", and Refund_Status = "Replacement Swapped - Promo Stripped", and email all 4 customers their updated fulfillment details.

5. CATEGORY-SPECIFIC RMA & COLD-CHAIN / FURNITURE SEGREGATION

Because Commercial Orders Dataset.csv spans multiple commercial business units, post-delivery RMA and SLA settlement workflows MUST enforce category boundaries by Item_SKU prefix:

- Workstation Electronics (EW-*): Covered by ESD return courier kits and 36-month batch traceability. Pre-shipment B-412 KVM orders follow QA_Batch_Recall Section 5 (swap to B-502).
- Solid Timber & Office Furniture (FUR-*): Orders with Order_Subtotal_BDT >= 30,000 BDT suffering carrier delays exceeding 72 hours (such as ORD-2026-1026 at 78h and ORD-2026-1027 at 84h) qualify for a 100% White-Glove Freight Fee Rebate (waiving Shipping_Cost_BDT to 0 or issuing freight refund) alongside SLA compensation governance.
- Handbags & Personal Leather Goods (HB-*): Subject strictly to the 15% Total Discount Cap. If Delay_Hours > 48 and Promo_Discount_Pct is already 15% (ORD-2026-1030), additional percentage stacking requires Controller approval or a fixed store credit voucher.
- Perishable Cold-Chain Bakery (CK-*): Zero physical RMA return is ever permitted past 24 hours of dispatch due to food safety compliance. Delayed perishable orders exceeding 24 hours (ORD-2026-1028, Delay_Hours = 28) receive instant Refund_Status = "Perishable SLA Credit" (100% store credit or zero-cost morning re-bake dispatch) without return logistics.

6. MOBILE WALLET (bKash) 10,000 BDT SINGLE-TRANSACTION CAP & SPLIT PAYOUTS

Merchant payment gateway settlement limits restrict single automated Mobile Wallet (bKash) refund reversals to 10,000 BDT per API settlement batch. Whenever a bKash-paid order with Order_Subtotal_BDT > 10,000 BDT requires a cash reversal or post-delivery RMA refund (for example ORD-2026-1024 at 11,500 BDT or ORD-2026-1022 at 18,400 BDT), automated execution MUST pause in CLARIFICATION_REQUIRED and offer:

- OPTION A (Split Cap Settlement): Refund 10,000 BDT back to the customer bKash wallet and issue the remaining balance as an Instant Store Wallet Credit (Refund_Status = "Partial bKash + Store Credit").
- OPTION B (Treasury Manual EFT Override): Route the entire order balance to manual Corporate Bank EFT Payout verification (Refund_Status = "Pending Bank EFT Verification").

7. HIGH-VALUE PREPAID DUAL-APPROVAL ESCROW & >72-HOUR DELAY AUDIT

Any Credit Card or Bank Transfer refund/rebate on an order with Total_Amount_BDT >= 30,000 BDT requires explicit Treasury audit citation (Dual-Signoff Flag) and cross-verification against Carrier_SLA_and_Freight_Escalation_Policy.pdf (SLA-LOG-2026-07) before funds release.
