## 1. VENDOR QUALITY THRESHOLDS & AUTOMATIC QC CHARGEBACK SCHEDULE

All international garment manufacturers listed in supplier_purchase_orders.csv contractually warrant >= 95.0% first-pass Acceptance Quality Limit (AQL 2.5). Any Purchase Order whose verified qc_pass_rate_pct falls below contractual tolerances triggers automated financial penalty enforcement:

- Warning Band (90.0% <= qc_pass_rate_pct < 95.0%): Applies to PO-2026-402 (Guangdong Pearl Weaving Co., 90.0%). Requires Formal Corrective Notice (no monetary chargeback if salvage re-pressing succeeds).
- Chargeback Band (80.0% <= qc_pass_rate_pct < 90.0%): Applies to PO-2026-403 (Porto Linen Collective S.A., 83.3%, 4 stained garments). Triggers mandatory 10% invoice deduction and replacement air-freight recovery request to vendor contact_email.
- Severe Short-Ship & Claim Escalation (qc_pass_rate_pct < 80.0%): Applies to PO-2026-401 (Zhejiang Meridian Knitwear Ltd., 66.7%, 20 moisture-damaged units of VL-POLO-BLK). Requires filing Marine Insurance & Vendor Debit Note (25% invoice holdback) plus escalating PO-401 to "Claim Hold - Audit" if salvage fails.

## 2. BUYER PARTIAL SHIPMENT COMPENSATION & ON-HOLD CANCELLATION WINDOWS

When a Priority or Standard buyer in backorders_dataset.csv receives partial fulfillment due to vendor short-shipment (e.g., BO-2013 under Option 2), the buyer is entitled to a 5% invoice credit memo on unfulfilled units, or penalty-free cancellation if customs-held/in-transit stock remains unreleased past 10 business days from order_date.

## 3. SEASONAL SALVAGE CLEARANCE VS INSURANCE WRITE-OFF CONFLICTS

Moisture-affected cartons placed under Surveyor Claim CLM-CTG-882 (BIN-Q99-HOLD) may not be steam re-pressed for resale on products.csv without written waiver from the underwriter. Mixing uncertified quarantine lots into active retail inventory violates Veloura Brand Integrity Standards.
