==========
VELOURA APPAREL & LIFESTYLE LTD.
GLOBAL PRICING GOVERNANCE & MARGIN COMPLIANCE POLICY
==========
Policy ID: SOP-FIN-2026-04 (Rev 3.2)
Department: Finance, Brand Governance & Revenue Protection
Enforcement: Mandatory Pre-Commit Validation on All Catalog Updates
Support Contact: velourabd.online@gmail.com | 01629743377
==========
1. PURPOSE & BRAND EQUITY CHARTER
Veloura positions its apparel lines across distinct market tiers ranging from everyday breathable resort wear to high-margin evening luxury shirts. Unchecked algorithmic or blanket discounting erodes brand equity and violates wholesale Minimum Advertised Price (MAP) agreements. All database mutations affecting the products.csv catalog must pass this policy prior to execution.
2. STANDARD TIER PROMOTIONAL ALLOWANCES
2.1 Resort & Everyday Lines ("summer shirt", "shirt", "polo", "full shirt"):
Seasonal promotional campaigns may increase discounts on "summer shirt" items up to a maximum ceiling of 45% off base retail price without special executive sign-off, provided net unit margin remains positive.
2.2 Return & Refund Eligibility Alignment:
Promotional items remain eligible for standard customer support resolution only if reported within the return window to velourabd.online@gmail.com or 01629743377 with a valid order number, and only when the item is unused, undamaged, and in its original packaging.
3. LUXURY COLLECTION MARGIN FLOOR & DISCOUNT CAP (STRICT GOVERNANCE RULE)
Items categorized as "luxury shirt" in products.csv (specifically including "Men's new follower stylish long-sleeved shirts" and "Sparkle fusion Shirt") are governed by strict margin protection controls:
3.1 Maximum Cumulative Discount Cap (30% Ceiling):
Under NO circumstances may the total "discount" column value for any item in the "luxury shirt" category exceed 30% (discount <= 30%).
3.2 Hard Net Selling Price Floor (1,200 Minimum):
The post-discount net price (Price * (1 - Discount/100)) of any "luxury shirt" item must NEVER fall below 1,200 (BDT 1,200).
4. AUTOMATED CONFLICT ADJUDICATION PROTOCOL (SOCRATIC GATE REQUIREMENT)
Whenever an internal merchandising memo or operator instruction requests a blanket discount increase (for example, +20%) that causes one or more "luxury shirt" rows to exceed the 30% maximum discount cap or drop below the 1,200 net price floor, automated execution MUST PAUSE in state CLARIFICATION_REQUIRED and prompt the operator to select between two compliance resolutions:
- OPTION 1 (Cap Luxury Line at Governance Ceiling):
Apply the full requested discount increase (+20%) to all eligible "summer shirt" rows, while capping affected "luxury shirt" rows strictly at the 30% maximum discount ceiling (and enforcing the 1,200 net price floor).
- OPTION 2 (Exclude Luxury Line from Markdown Campaign):
Apply the requested discount increase (+20%) exclusively to eligible "summer shirt" rows, and completely exclude all "luxury shirt" rows from both the database mutation and the promotional buyer email announcement.
