MERIDIAN COMMERCIAL OPERATIONS & LOGISTICS DIRECTORATE

Official Notice: Inbound Logistics & Delivery Schedule Revision

Reference: ADV-DEL-2026-904 **Classification:** Priority Commercial Advisory **Issuance:** Operations Bureau

ADDRESSED TO	Valued Customers, Corporate Accounts & Commercial Partners
ISSUED BY	Logistics Fulfillment Command & Supply Chain Management
SUBJECT MATTER	Temporary Dispatch Deferral Due to Primary Carrier Bottlenecks

1. FORMAL STATEMENT OF DELIVERY DELAY

Please be advised that an unforeseen disruption across regional maritime transit lanes and multimodal inland rail freight corridors has resulted in a temporary delay in inbound inventory replenishment. In accordance with certified carrier reports, unscheduled customs clearance congestion and severe weather-related port terminal holding patterns have collectively extended primary cargo transfer timelines by approximately 3 to 5 business days. Consequently, order shipments scheduled for standard dispatch during the current operational cycle are experiencing a revised delivery estimate. We fully recognize that our clients depend upon punctual arrival schedules, and we sincerely apologize for any logistical inconvenience this transit deferral may introduce to your planned business or personal operations.

2. OPERATIONAL MITIGATION & EXPEDITED PROCESSING

To mitigate downstream impact and restore fulfillment velocity, Meridian Logistics has initiated emergency protocol Bravo-4, enacting the following operational interventions:

- **Air-Freight Rerouting:** High-priority cargo manifests have been transitioned from surface maritime routes to dedicated air-cargo corridors to clear primary bottleneck terminals immediately.
- **Extended Hub Operations:** Regional fulfillment hubs in Dhaka, Chittagong, and Sylhet have deployed 24-hour staging crews to process incoming containers without dock wait times.
- **Automated Carrier Tracking:** Automated dispatch notifications and milestone tracking updates are being pushed directly to registered client emails upon courier pickup.

3. ACCOUNT MANAGEMENT & INQUIRIES

Our dedicated client experience teams are monitoring delayed consignments individually. If your shipment involves urgent procurement requirements or scheduled project deadlines, our account officers are prepared to assist with partial releases, alternative SKU substitutions, or priority routing at no additional expense.
